

How It Works!

Here at WCS, we want to make owning a website as simple and stress-free as possible for you! Below is the process of how we will take your website idea and turn it into reality!

1 Initial Meeting

This is the first step in your website's journey. During the initial meeting, we will talk about what is the purpose of the website, examples of what you are looking for, colors/fonts, functionality, the whole works! This is a crucial step as we will need to know every detail you are looking for so we can design and develop the website properly.

2 Design

After we have all the information needed to create the website, we will then design a mockup of the website. We will present the design to you as a PDF and if the design is approved, we will then start development.

3 Development

Now that the design is ready to go, it is time for the building process. Here, we will build the website with all the bells and whistles you requested. This step can take approximately 2 - 3 weeks to complete, depending on the complexity of the project.

4 Launch

Once the fully-built website is approved, then it is time for the exciting part. We will start the launching process. Here, we will set up a hosting plan and a domain name, if not owned already, and migrate the website. Finally, your website is live and ready to go!
